

AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions and listings of claims in the application:

1. (currently amended) A method of purifying contaminated soil containing clay or silt by microorganisms, comprising
adding perlite to contaminated soil containing clay or silt, and then
mixing the soil by agitation, so as to cause the perlite to absorb pore water contained in the clay or silt,
without aerating by introducing injected air,
while adding microbes to the contaminated soil that degrade the contaminants contained within the contaminated soil ~~or utilizing degradation microbes already present in the contaminated soil~~, thereby microbially degrading the contaminants, wherein the microbes comprise the MO7 strain.
2. (currently amended) The method of purifying contaminated soil by the MO7 strain of microorganisms according to claim 1, wherein the ~~degradation microbes~~ and the perlite are separately added to the contaminated soil ~~while not being contained by the inorganic soil-improving material.~~
3. (cancelled)
4. (cancelled)

5. (cancelled)

6. (currently amended) A method of purifying contaminated soil containing clay or silt by microorganisms, comprising the steps of:

- adding perlite to contaminated soil containing clay or silt;
- mixing the soil by agitation;
- without aerating by introducing injected air; and
- degrading contaminants contained in the contaminated soil by adding microbes to the contaminated soil that degrade the contaminants within the contaminated soil ~~and/or utilizing degradation microbes already present in the contaminated soil, wherein the microbes comprise the MO7 strain.~~

7. (currently amended) The method of purifying contaminated soil by the MO7 strain of microorganisms according to claim 6, wherein the ~~degradation~~ microbes and the ~~inorganic soil improving material~~ perlite are separately added to the contaminated soil.

8. (cancelled)

9. (cancelled)

10. (cancelled)

11. (previously presented) The method of claim 1, wherein the soil is contaminated by chlorinated organic compounds.

12. (previously presented) The method of claim 11, wherein the chlorinated organic compound is trichloroethylene.

13. (previously presented) The method of claim 6, wherein the soil is contaminated by chlorinated organic compounds.

14. (previously presented) The method of claim 13, wherein the chlorinated organic compound is trichloroethylene.

15. (previously presented) The method of claim 1, wherein the soil is contaminated by petroleum hydrocarbons.

16. (previously presented) The method of claim 15, wherein the petroleum hydrocarbons are selected from heavy oil and gasoline.

17. (previously presented) The method of claim 6, wherein the soil is contaminated by petroleum hydrocarbons.

18. (previously presented) The method of claim 17, wherein the petroleum hydrocarbons are selected from heavy oil and gasoline.
